

Solve Equations

Write which of the numbers 4, 8, or 12 is the solution of the equation.

1. $6 + n = 14$

2. $40 - n = 28$

3. $n + 58 = 62$

4. $n - 6 = 6$

Use mental math to solve each equation. Check your solution.

5. $23 + n = 30$

6. $100 - n = 60$

7. $30 + n = 50$

8. $n - 10 = 5$

Solve the equation. Check your solution.

9. $29 - n = 22$

10. $n + 15 = 55$

11. $60 - n = 2$

12. $14 + n = 20$

13. $7 + n = 16$

14. $42 - n = 26$

15. $80 - n = 69$

16. $6 + n = 32$

17. $46 + n = 59$

18. $n - 16 = 9$

19. $33 - n = 14$

20. $(n - 5) + 8 = 23$

21. $25 + n = 40$

22. $16 + n = 26$

23. $26 - n = 9$

24. $11 + (7 + n) = 24$

Mixed Review

25. What place value is the digit 7 in the number 43.567? _____

26. Order the numbers 4.578; 3.67, and 3.792 from least to greatest.
